Author Index to Volume 26

The issue number is given in front of the page numbers

Aráoz, J., Forward chaining is simple(x) (1) 23– 26

Barahona, F., On the k-cut problem (3) 99–105
Brown, G.G., R.F. Dell and M.P. Olson, Valid integer polytope (VIP) penalties for branch-and-bound enumeration (3) 117–126

Cai, X., *see* Zhang, G. (5) 217–222
Caron, R.J., *see* Holder, A.G. (2) 49– 54
Cheng, T.C.E. and G. Wang, An improved heuristic for two-machine flowshop scheduling with an availability constraint (5) 223–229
Choi, G., *see* Sherali, H.D. (1) 1– 8
Csenki, A., Asymptotics for renewal-reward processes with retrospective reward structure (5) 201–209

Dell, R.F., *see* Brown, G.G. (3) 117–126

Epstein, L. and J. Sgall, A lower bound for on-line scheduling on uniformly related machines (1) 17– 22

Ghiani, G. and G. Improta, An algorithm for the hierarchical Chinese postman problem (1) 27– 32
Güntzer, M.M. and D. Jungnickel, Approximate minimization algorithms for the 0/1 Knapsack and Subset-Sum Problem (2) 55– 66
Goemans, M.X., J.M. Wein and D.P. Williamson, A 1.47-approximation algorithm for a preemptive single-machine scheduling problem (4) 149–154
Grippo, L. and M. Sciandrone, On the convergence of the block nonlinear Gauss–Seidel method under convex constraints (3) 127–136

He, Q.-M., Classification of Markov processes of M/G/1 type with a tree structure and its applications to queueing models (2) 67– 80
Holder, A.G. and R.J. Caron, Uniform bounds on the limiting and marginal derivatives of the analytic center solution over a set of normalized weights (2) 49– 54
Hwang, F.K., S. Onn and U.G. Rothblum, Linear-shaped partition problems (4) 159–163

Improta, G., *see* Ghiani, G. (1) 27– 32

Jungnickel, D., *see* Güntzer, M.M. (2) 55– 66

Konana, P., *see* Sanchez, S.M. (2) 81– 89
Koulamas, C. and G.J. Kyparisis, Scheduling on uniform parallel machines to minimize maximum lateness (4) 175–179
Kyparisis, G.J., *see* Koulamas, C. (4) 175–179

Lawphongpanich, S., Simplicial with truncated Dantzig–Wolfe decomposition for nonlinear multicommodity network flow problems with side constraints (1) 33– 41

Elsevier Science B.V.
PII: S0167-6377(00)00051-1

Luebke, E. and J.S. Provan, On the structure and complexity of the 2-connected Steiner network problem in the plane (3) 111–116
Luna, H.P.L. and P. Mahey, Bounds for global optimization of capacity expansion and flow assignment problems (5) 211–216

Mahey, P., *see* Luna, H.P.L. (5) 211–216
Müller, A., On the waiting times in queues with dependency between interarrival and service times (1) 43– 47

Olson, M.P., *see* Brown, G.G. (3) 117–126
Onn, S., *see* Hwang, F.K. (4) 159–163

Perry, D. and M.J.M. Posner, A correlated M/G/1-type queue with randomized server repair and maintenance modes (3) 137–147
Posner, M.J.M., *see* Perry, D. (3) 137–147
Potts, C.N., *see* Sidney, J.B. (4) 165–173
Provan, J.S., *see* Luebke, E. (3) 111–116

Rothblum, U.G., *see* Hwang, F.K. (4) 159–163

Salama, Y., Optimal control of a simple manufacturing system with restarting costs (1) 9– 16
Sanchez, S.M. and P. Konana, Efficient data allocation for frequency domain experiments (2) 81– 89
Sciandrone, M., *see* Grippo, L. (3) 127–136
Seila, A.F., *see* Zheng, S. (5) 231–235
Sgall, J., *see* Epstein, L. (1) 17– 22
Sherali, H.D., G. Choi and C.H. Tuncbilek, A variable target value method for nondifferentiable optimization (1) 1– 8
Sidney, J.B., C.N. Potts and C. Sriskandarajah, A heuristic for scheduling two-machine no-wait flow shops with anticipatory setups (4) 165–173
Sriskandarajah, C., *see* Sidney, J.B. (4) 165–173
Strusevich, V.A., Group technology approach to the open shop scheduling problem with batch setup times (4) 181–192
Sviridenko, M.I., Worst-case analysis of the greedy algorithm for a generalization of the maximum p-facility location problem (4) 193–197

Teunter, R.H. and E.S. van der Poort, The maximum number of Hamiltonian cycles in graphs with a fixed number of vertices and edges (2) 91– 98
Thorlund-Petersen, L., Comparison of probability measures: Dominance of the third degree (5) 237–245
Tijms, H.C. and R. Veldman, A fast algorithm for the transient reward distribution in continuous-time Markov chains (4) 155–158
Tuncbilek, C.H., *see* Sherali, H.D. (1) 1– 8

Van der Poort, E.S., *see* Teunter, R.H. (2) 91– 98
Veldman, R., *see* Tijms, H.C. (4) 155–158

Wang, G., *see* Cheng, T.C.E. (5) 223–229
Wein, J.M., *see* Goemans, M.X. (4) 149–154
Williamson, D.P., *see* Goemans, M.X. (4) 149–154
Woeginger, G.J., A comment on scheduling on uniform machines under chain-type precedence constraints (3) 107–109
Wong, C.K., *see* Zhang, G. (5) 217–222

Zhang, G., X. Cai and C.K. Wong, Linear time-approximation algorithms for bin packing (5) 217–222
Zheng, S. and A.F. Seila, Some well-behaved estimators for the M/M/1 queue (5) 231–235
